

Mansard Re-do Project 3

3/21/17

On 2/19/17, the principal engineer of Norex Engineering Inc. was the special guest speaker at the executive meeting. For two hours, the Norex rep. answered questions pertaining to the oversight of the Mansard Project; and explained the responsibilities that will be shouldered by his company.

Afterwards, there was much discussion and more questions. Several “what if’s” were imagined and partially dispelled. In the end, many board members could not bring themselves to vote. It was decided to request our legal council to review the contract for content and pitfalls. On March 10, the reply came back, “...there are no obvious traps in this contract. It appears to be pretty straight forward to me”.

On 3/21 the Board voted to allow Norex Engineering Inc. to oversee the construction and repair, as well as to interface with the CoH during inspections and obtaining and necessary permits.
